## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 6) ☐ Other:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1- 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Hey et al.

Hey et al discloses inclusion of diborane and phosphine with silicon tetrachloride in CVD of polysilicon on a wafer [0043].

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson.

Anderson discloses inclusion of diborane and phosphine with silicon tetrachloride in CVD of polysilicon on a wafer [0020].

Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of Hey et al or Anderson.

Art Unit: 2823

Hey et al and Anderson are relied on for the teachings discussed above. Use of the amount of diborane recited would have been a matter of routine optimization within the teachings of the references to achieve a desired device density and a desired device performance on the finished wafer.

Claims 10-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Vinal and Anderson.

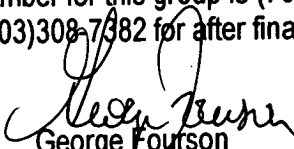

Vinal discloses phosphorous implantation into in-situ doped p-type polysilicon (the paragraph bridging columns 14 and 15). The reference does not disclose use of a chlorosilane as the silicon source in the CVD of the polysilicon. Anderson is relied on for the teachings discussed above related to use of  $\text{SiCl}_4$  and  $\text{B}_2\text{H}_6$  in CVD of polysilicon. It would have been within the scope of one of ordinary skill in the art to combine the teachings of Vinal and Anderson to enable the polysilicon CVD step of Vinal to be performed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956. See MPEP 203.08.
